Our products

H LED Harness

The H LED harness is our flagship product, and over the years, we have consistently worked to improve it, making it extremely easy to put on while ensuring comfort for the dog. In our Italian workshop, we have dedicated ourselves to creating a harness that stands out from others in the market.

Norwegian LED Harness

The Norwegian LED harness was our first product to enter the market. This harness is widely acclaimed for its ease of use, the comfort it provides, and its ergonomic design. Often made with soft materials, it ensures the absence of skin irritations or damage to the dog's fur.

Collar Led

The LED collar is a versatile product that fits all sizes, ensuring that the dog's growth is not overlooked. Thanks to its ability to adjust the length, it can be modified to accommodate changes in the dog's body over time. Another significant advantage is the use of a breathable material between the nylon and the dog's fur, providing optimal comfort.

Leash Dog

The dog leash is made of thick, wear-resistant nylon and utilizes innovative Zero Shock technology that perfectly adapts to control and traction cushioning. Retractable leash for large dogs. Dual handle, soft padded grip provides incredible comfort and protects your hand from strong pulling forces.

LED

The LEDs by PettyItalia have been designed and crafted with the aim of ensuring optimal brightness even at long distances. Due to the expansion of the silicone part, the LED is visible up to a distance of 50 meters.

H LED Harness

This H-shaped harness is made with durable, high-quality nylon, providing your dog with increased comfort and reducing pressure around the neck during walks with your loyal four-legged companion. It features two safety buckles positioned at rib height. The H-shaped harness is equipped with two adjustments at rib height and one under the belly, allowing you to shorten or lengthen it based on your dog's size. Sturdy stitching ensures long-lasting quality, while the metal D-ring provides a secure attachment point for the leash.

Norwegian LED Harness

The Norwegian harness is breathable and features a high-quality, breathable mesh fabric that is durable and comfortable, providing total control and style. Easy to put on and take off, it comes with an underbelly adjuster to lengthen or shorten the nylon for a customized fit. The plastic side buckle with a double red button closure ensures added safety.

LED

Our LEDs are customizable in color, and we offer a wide range of options, including blue, green, red, purple, and white. These colors ensure maximum visibility even at long distances. The LED can be recharged via a micro USB connection, with a guaranteed charging duration of approximately 10 hours.
